PROFESSIONAL SUMMARY

Full stack Developer with a B.S. in Computer Science experienced in building full-stack web and mobile applications with React, Next.js, TypeScript, React Native, Expo, Supabase, and PostgreSQL. Skilled in REST APIs design, authentication and authorization, database design, testing, secure application development, and Git/GitHub workflows within Agile teams. Proven experience leading sprint delivery, reviewing peer code, and shipping features across client and internal projects

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, HTML, CSS

Frameworks: React, Next.js, Node.js, Express.js, Tailwind CSS

Databases & Tools: PostgreSQL, Supabase, Git, GitHub, Docker, Postman, Row Level Security (RLS)

Engineering: REST APIs, Authentication, Unit Testing, Code Reviews, CI/CD

PROFESSIONAL EXPERIENCE

Software Developer | Contract | HTP Consultancy Ltd. | Mar 2026 – Sep 2026 | *London, UK (Remote)*

- Developed a full-stack cybersecurity learning application using React Native, Expo, Supabase, and PostgreSQL, delivering **8 interactive games** with multiple gameplay mechanics through a shared game engine.
- Designed a **12-table PostgreSQL database** with Row Level Security, server-side RPC functions, and rate limiting to protect user data and sensitive operations.
- Integrated **Supabase Authentication, Realtime subscriptions, and database functions** across the dashboard, leaderboard, profile, and messaging features.
- Managed dependency security via GitHub Dependabot, reducing alerts from **44 to 7** and eliminating all Critical issues while preserving Expo SDK compatibility.
- Designed and deployed HTP Consultancy's production website using **Next.js and Tailwind CSS**, including a Resend-powered contact workflow and custom-domain DNS/SSL configuration.

Software Developer Intern | Team Lead | TechTalks) | Jun 2026 – Aug 2026

- Led a 6-member team building Career Brain, a full-stack career intelligence platform, coordinating sprint tasks and documentation in Jira and Notion.
- Established the team's Git/GitHub workflow feature branching, pull requests, and code reviews and reviewed teammates' PRs before merging.
- Built a real-time collaborative workspace (task board, chat, file sharing, scheduler) using Supabase Realtime, enforcing member-level access control via RLS across **21 database tables**.
- Architected the authentication system and secure file-storage pipeline using private Supabase Storage, JWT verification, and RLS to restrict candidate data to authorized users.

PROJECTS

Career Brain | Career Intelligence Platform | Next.js, React, Supabase

- Job Seeker Dashboard: Enables users to build professional profiles, showcase skills and experience, discover AI-matched job opportunities, submit and track applications, and collaborate on projects through private workspaces with task management, team chat, and file sharing.
- Employer Dashboard: Enables companies to publish and manage job opportunities, customize application requirements and screening questions, review candidate profiles and skill-match scores, track applications, and manage recruitment decisions.

CyberGame | Cybersecurity Learning Platform | React Native, Expo, Supabase

- Architected a centralized game engine supporting 8 cybersecurity games with scoring, timers, audio, tutorials, glossaries, and multiple gameplay mechanics, enabling new games to be added through database configuration rather than duplicated game logic.
- Integrated Supabase Authentication, Realtime subscriptions, and database functions with layered security using input validation, server-side rate limiting, PostgreSQL functions, and Row Level Security across 12 database tables; reduced GitHub Dependabot alerts from 44 to 7 and eliminated both Critical vulnerabilities while maintaining Expo compatibility.

HTP Consultancy Website | Next.js, React, Tailwind CSS, Resend API, Vercel

Delivered a 6-page production website with responsive layouts, reusable UI components, and cross-device optimization for a UK cybersecurity consultancy **Link**: Live Demo

EDUCATION

B.S. Computer Science | Lebanese International University | 2021 - 2024
Relevant Coursework: Data Structures, Database Systems, Software Engineering, Algorithms

Front-End Web Development Program | The Digital Hub, UNRWA | Sep 2025 – Dec 2025
React, Next.js, Agile/Scrum, Jira, SOLID principles, software design patterns, responsive UI/UX.

CERTIFICATIONS

- Modern Web Development, Scalable Architecture & API-Driven System Design | TechTalks | Internship
- Front-end Web Development Program | UNRWA - DigitalHub
- CyberOps Associate | Cisco Networking Academy
